WiFi in the Park™ LLC (WITP) is a certified Woman Owned Small Business and Emerging Small Business serving government and commercial customers across North America providing Internet Service Provider (ISP) services, managed WiFi, satellite and other network services. While our name underscores our services to Federal, State and Local parks and communities, rest assure, we are much more than that.

The management team for WITP has been in the telecommunications space for 37 years, and our teaming partner -- ViaSat's workforce, is well versed in military operations and requirements. It includes retired Flag Officers, Test Pilots, Tier One Special Forces and combat experienced Soldiers, Sailors, Airmen, Marines and Coast Guardsmen and graduates of Air Universities Air War College, Air Command and Staff, Squadron Officers School and the School of Advanced Air and Space Studies.

We customize fully managed solutions for each military, government, entity park and park system, community or enterprise or entity needing managed WiFi. WITP can connect any number of locations and existing networks into a national network of individually customized ubiquitous and interconnected managed WiFi systems, providing seamless access across all WITP managed locations.

Our managed WiFi-as-a-Service include the ISP, satellite ISP when needed, WiFi equipment, central management & 24/7/365 support. WITP's software platform includes custom cloud and e-commerce systems, value added services, monetization opportunities and special military applications to enable each WiFi host location to deliver the right WiFi experience to itself and its constituents.

CORE COMPETENCIES

- Wireless communications
- Internet Service Providers (ISP)
- Military communications
- Fiber, wired, wireless & satellite services
- WiFi, fiber, wireless & copper infrastructure
- Network management
- Cyber security
- Cloud services
